Strap cross design | Fix the ankle joint to prevent varus and freely adjust the tightness.

# ***SIMPLE AND COMFORTABLE SAFE PROTECTION***

## ***Why use ankle support***

*Give your ankles more stable protection.*

**Playing ball sprain**

When jumping, the soles of the feet tend to turn out and sprain when landing.

**Habitual injury**

After the injury, there is no active cooperation treatment, which loosens the ligaments in the later stage, resulting in habitual injuries.

**Fixed after injury**

Lack of protection after an ankle injury affects the speed of recovery.

## DETAILS SHOWS

.....

**Breathable straps entangle** | The straps are made of highly elastic and breathable fabric, Breathable and sweat-absorbent.

—  
Bandage pressure, sports ankle protectors

## WEARING METHOD

01

First confirm the top, bottom and ankle parts of the product

02

The opening on the product is aligned with the heel

03

Pull up the straps crosswise, wrap them around the ankle joints and buckle them near the raised bones on both sides

04

Make sure that the Velcro on both ends of the strap has been buckled
